“Growing Your Career Path”

“Being honest with ourselves is like fertiliser for career growth.”

Annette Kinnear

Like most things, career success is about establishing – and living by – carefully chosen principles, and applying them in balance with consistent excellence, hard work and a vision that’s ambitious but grounded in the reality of present circumstances. These factors make success not only achievable but infinite.

Annette introduces original concepts which build maturity and increase our repertoire of internal resources. This reduces stress levels and heightens performance. And, high performance - in any area of our lives - is what ultimately grows our careers to the level we desire.

Some of the topics covered are:

- Freedom from self-imposed restrictions
- Effective goal setting
- Forming emotional contracts with business associates
- Heroic action orientation and conflict resolution
- Real-time problem solving
- The importance of the right associations
- Practicing consistent personal excellence
- Meaningful workplace creativity.
